35.	Continue to hire professors that truly care about the students they serve. Mentoring and leadership are very important. Farmers put time and care into growing their crops in order to get the best yield. Continue to put time and care into the students, because they will be a reflection of Lander in the community and in the world.	view
36.	A more updated Education and Nursing program - the two are out of date and do not teach the current trends in either topic.	view
37.	Students going through the education program should be familiar with specific curriculums being used in the classroom. Also, having more training in behavior managment for the classroom would be beneficial.	vlew
38.	Allow student input, bring in members of the community to work with students (in addition to content area professors), provide opportunities for students to work on real world assignments and projects.	view
39.	I wish I had found more guidance in making my major choices.	view
40.	I believe it would better a student's experience if Lander would work with community business to place students in jobs that allow them to get a feel for the field in which they are studying.	A pillon
41.	Hiring the best qualified instructors	view
42.	Community problem solving which will encompass world issues.	vidrar
43.	I graduated a long time ago and I am not sure how to answer this.	view
44.	I really think Lander was great for me considering I was not a traditional student. Never did I feel neglected	view
45.	If it was like it use to be, one professor's recommendation determined a Lander college graduates fate in some school districts. It should be a team recommendation because that is a lot of control to give to one person.	wigner
46.	Offer programs that would be exclusive to Lander and nationally recognized. An example would be study abroad while collaborating the experience with local schools as alumni Cameron Dorn did when he visited Peru.	Appe
47.	Local businesses	w layers
48.	I believe student teaching should be a full year experience.	te februar
49.	Provide more courses on discipline in the education department	view
50.	Constructive faculty mentoring and/or community internships during freshman year	vlaw
51.	Being an education major, all of my responses are based on the Education Program and what preservice teachers need. I think the Education Department does a wonderful job preparing students to teach. It is very important that they continue to focus more on teaching with technology, critical thinking, problem-based learning, and collaboration. The best way to do this is for professors to model this type of teaching in their classrooms.	wiene
52.	Strive to be the best in each major or unit of study, Point out successes. Have staff to go the extra mile to help students to succeed and improve academically,	view
53.	I received an excellent education at Lander and think Lander puts out quality graduates.	vlew
54.	more behavior management training	wigar
55.	Continued and increased collaboration between Lander Education department and local SC school districts. District curriculum changes are a constant. It is beneficial for the Lander Education graduate to be abreast of current curriculum, testing, and policies.	view
56.	A more rigorous screening for acceptance into programs is imperative. This would help prevent embarrassment to the profession.	view
57.	In my case, for the first 3 years, 1 attended evening and weekend classes. Provide more opportunities to accommodate (encourage) older learners to BEGIN college. If not for the evening and weekend program offered at the time, I may not have attended 4 years of college.	view
58.	Higher expectations.	view
59.	Improve the over all academic programs, accept a higher quality of studentanybody can get into to Lander as they have been just taking anyone over that past 5+ years to get the enrollment up and look good on paper. They need to work on retention of students	view
60.	Within the educational program, creating classes that address classroom management would be of great benefit.	view
61.	My years at Lander I learned a lot and enjoyed my college experience, what could enhance the quality of the programs is more work readiness skills being taught in a classroom setting.	view
62.	As far as the educational department, I feel taht students would benefit from longer practicum and student teaching experiences.	view
63.	More focused attention in preparing students for the workplace. Examples include: professionalism, accepting constructive criticism, work ethic etc.	view
64.	Educators need tips for classroom management strategies.	Ajdin
65.	The faculty should include more rigor into their classes.	view

and in order to prepare students, they have to break down for us what exactly they want. Someone did it for them one day so please do that in return. We pay tuition for professors to "teach" us, not sit back and feel privileged in their position. Lander does well in this except when preparing students for real life experience as a teacher or nurse, dealing with administrators and bosses, and managing time. view Clinical experiences and student teaching is very beneficial. Students would benefit by teaching more lessons view before their actual student teaching. view 37. Lander has a wonderful record preparing future teachers, nurses, and business leaders. The emphasis on 38. view technology in education and the workplace may indicate an area for improvement. To prepare one for the real world is to live it. What better way to learn. where view 40. 41. Service learning and real life situations in the classroom. Real life expectations as well. I was in the first group to study abroad and it was the main reason for deciding to attend Lander for my choice for higher education along with the small staff to student ratio. Lander does well because one feels like they are a part of another family; however, not all student get the studying abroad experience. Lander could improve and has in this area by offering this type of study experience to all Bearcats. where 43 Community service. Continue to raise awareness of Lander as a high quality institution. where 44. I wish the Alumni Association had better contact with Alumni. I have lived in Greenwood all my life and graduated from Lander and never hear anything about Alumni events until after they happen Well I believe Lander could do better with recruiting more minorities for their education programs and their sports programs besides basketball. My sons play soccer and when I take them to a game they have lots of questions as to why there are not more African American players and I don't know how to answer that question, because when you look at real world soccer and baseball it is very diverse. Lander prepares its education students academically but could use more time in the field. 46. Pros- strong nursing program 47 Cons- need a stronger visual and performing arts curriculum I am not sure that what I have to say is relevant to today's students since I graduated in 1990; however, looking back, I was very prepared when I went into the classroom to teach and the program has obviously continued to improve, judging from the student teachers I've observed. Provides opportunity for knowledge to be learned. Provide more real life / work day type experiences and 49. situations. 50. I felt very prepared for the real world. well- pedagogy Improve- behavior management strategies Lander does an excellent job in preparing graduates for job searches (resume workshops, mentoring, mock interviews, etc.) I would like to see more emphasis placed on assistance for the non-traditional student who is returning or starting college for the first time. Speaking with experience, the transition is confusing, and at 52. times overwhelming. There should be a freshman focus type class (or workshop) for the new non-traditional I was NOT prepared adequately for classroom management. Students need MORE time in classrooms early on with teachers who have strong classroom management skills. Making a seating chart is only a tiny component. There was also way too much emphasis on busy work given to students to complete. Deter use of student time would be learning how to develop relevant materials to use in the classroom or more time in an actual Lander professors incorporated team work and colaborative projects well.

An area for improvement would be to have more social options for "nontypical" students to feel more connected to campus activities. Hold students accountable for their actions and grades. Students know that Lander will not kick them out y layer I feel that Lander has done a great job of preparing me for the real world. 56. view Lander teaches teamwork, have internship opportunities and studies abroad. A work readiness class may be a good way to further prepare individuals for their jobs ahead. I felt well prepared to take my teaching exams. I had LOTS of classes in pedagogy. However, I felt out of touch with the current practices in the classroom at that time. I understand that educatioani trends change but students need to know what is expected of them and students in a real world classroom. wlaw Students have the content knowledge needed, Lander could work on providing more real world experiences 59. wiere and opportunities for its students. Lander provided a good variety of courses in content and related arts. wigne Question 1-I do not think Lander excels in preparing students for the real world. Lander can and should do a Ouestion 2 - Admission requirements should be raised for students. Just because someone makes the wiene question 2 - Admission does not mean they should be in college at Lander. Quality education can not nor should it be about the numbers - students nor money. I am embarrassed by our low ACT and SAT scores. The university should go for quality, not quantity. Lander should be a small school which awards diplomas for

academic excellence.

Graduate education regardles	Rigor in content and expectations; collaborative work that is based in workplace realities. Graduates need strong communication skills and need to understand the process of learning to read if they are education majors. They need to understand how to teach and support reading across the curriculum, regardless of the education major. Project CRISS is an example of a professional development program that we use in our district to try and help with this need.			qiaw
