Academic Program Assessment Report

Assessment is a term commonly used to encompass the process of gathering and using evidence to guide improvements.

SACSCOC requires that an institution "identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of seeking improvement based on analysis of the results".

Be sure to SAVE your progress as you work!

Program Goal

Goal

Goal 1

Program Goals are broad and overarching statements about the skills, knowledge, and dispositions students are expected to gain by the end of their course of study (big picture). They support the Institution's Mission/Goals.

Program Goal
Students graduating with a B.S. in Data Science will demonstrate an ability to apply computing concepts to use, manipulate, and analyze data.

Pillar of Success Supported
High-Demand, Market-Driven Programs

Outcomes

Outcome 1

Outcomes are specific, **measurable** statements that reflect the broader goals.

Academic Programs are required to develop **Student Learning Outcomes**, which describe knowledge, skills, and values that students are expected to gain as a result of their educational experiences.

Academic Programs may also develop **Operational Outcomes**, which describe the level of performance of an operational aspect of a program or office (ex. graduation rates, retention, employment data).

Most goals have at least two outcomes measured.

What type of Outcome would you like to add?
Student Learning Outcome

Enter Outcome
Students will be able to competently perform programming tasks in Data Science programming languages.

Timeframe for this Outcome
2023 - 2024 and 2024 - 2025

Performance Target for "Met"
70% or more of students in each of DSCI 330, DSCI 340, DSCI 440, and DSCI 499 will score at least 3.5 out of 5 on programming-related components of the final project assessment rubric.

Performance Target for "Partially Met"
The target will be consider to be partially met, if it is neither met nor not met.

Performance Target for "Not Met"
Less than 60% of students at least one of DSCI 330, DSCI 340, DSCI 440, and DSCI 499 will score at least 3.5 out of 5 on programming-related components of the final project assessment rubric.

Assessment Measure Used
Relevant components of the final project assessment rubric.

Frequency of Assessment
During each offering of DSCI 330, DSCI 340, DSCI 440, and DSCI 499

Data Collected for this Timeframe (Results)
N/A. This being the second year of this program these courses have not been taught yet.

Score (Met=3, Partially Met=2, Not Met=1)

Comments/Narrative
No comment. This is the second year of this program and data have yet to be collected.

Resources Needed to Meet/Sustain Results
Although these courses have not been taught yet we need a data science faculty member to support these upper-level courses and other program needs. We request a tenure-track faculty position to support the data science program and teach upper-level data science courses. Our estimate is $94K/year (approximately $72K for the salary and $22K for other employee benefits).

Explanation of How Resources Will Be Used
The faculty member hired to support the data science program will be responsible for the following:
1. To develop and teach upper-level data science courses
2. To mentor and advise students majoring in data science
3. To represent the data science program in open houses and other admission activities
4. To ensure that the information available on Lander's website and catalog regarding the data science program is accurate and up-to-date
5. To ensure that the data science program is assessed annually, data is collected from the designated classes, and collected data is analyzed and properly reported in the annual assessment report
6. To ensure that the data science courses are regularly reviewed and updated as needed

Outcome 2

Outcomes are specific, **measurable** statements that reflect the broader goals.

Academic Programs are required to develop **Student Learning Outcomes**, which describe knowledge,

skills, and values that students are expected to gain as a result of their educational experiences.

Academic Programs may also develop **Operational Outcomes**, which describe the level of performance of an operational aspect of a program or office (ex. graduation rates, retention, employment data).

Most goals have at least two outcomes measured.

Courses not taught yet.

Resources Needed to Meet/Sustain Results
Although these courses have not been taught yet but from the year 2023-2024 we will need a data science faculty member to support these upper level courses and other program needs. We request a tenure track faculty position to support data science program and teach upper level data science courses. Our estimate is $94K/year (approximately $72K for the salary and $22K for other employee benefits).

Explanation of How Resources Will Be Used
The faculty member hired to support the data science program will be responsible for the following:
1. To develop and teach upper-level data science courses
2. To mentor and advise students majoring in data science
3. To represent the data science program in open houses and other admission activities
4. To ensure that the information available on Lander's website and catalog regarding the data science program is accurate and up-to-date
5. To ensure that the data science program is assessed annually, data is collected from the designated classes, and collected data is analyzed and properly reported in the annual assessment report
6. To ensure that the data science courses are regularly reviewed and updated as needed

Although these courses have not been taught yet but from the year 2023-2024 we will need a data science faculty member to support these upper level courses and other program needs. We request a tenure track faculty position to support data science program and teach upper level data science courses. Our estimate is $94K/year (approximately $72K for the salary and $22K for other employee benefits).

Explanation of How Resources Will Be Used
The faculty member hired to support the data science program will be responsible for the following:
1. To develop and teach upper-level data science courses
2. To mentor and advise students majoring in data science
3. To represent the data science program in open houses and other admission activities
4. To ensure that the information available on Lander's website and catalog regarding the data science program is accurate and up-to-date
5. To ensure that the data science program is assessed annually, data is collected from the designated classes, and collected data is analyzed and properly reported in annual assessment report
6. To ensure that the data science courses are regularly reviewed and updated as needed

Goal Summary

Goal Summary/Comments
There are no results as this is the second year of the program.
