

Course Report

The **Course Report** in Qwickly provides an overview of student attendance throughout the semester. To access this report, select **Course Report** from the Qwickly course menu.

The **Course Report** consists of three components.

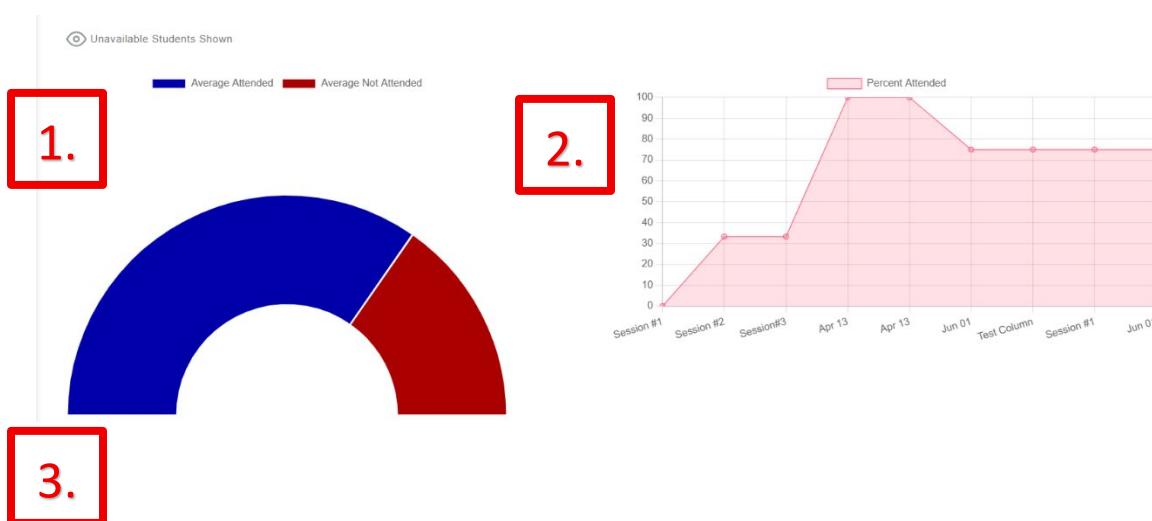

1. Attendance Summary Gauge - This semi-circle chart shows the overall average attendance rate.

2. Attendance Trend Graph - This line graph shows the attendance rate for each class session.

These graphics give a broad understanding of how often students attend the class.

3. Student Attendance Table – This Table displays historical attendance data including total absences, percentage attended, first session attended, and last session attended.

This data in this table can help instructors identify patterns of chronic absenteeism and plan and implement the necessary interventions.

Last Name ▼	First Name ▼	Student ID ▼	Absence ▼	% Attended ▼	First Attended ▼	Last Attended ▼
Clark	Joey	-	4.00	55.56 %	April 13, 2026	June 01, 2026
Clark	Wesley	-	1.00	88.89 %	March 25, 2026	June 01, 2026
White	S	-	6.00	33.33 %	April 13, 2026	June 01, 2026
