

UNIT/PROGRAM NAME: Chemistry
OFFICE OF PRIMARY RESPONSIBILITY: Department of Physical Sciences
ASSESSMENT COORDINATOR: David Gardner
SUBMISSION DATE OF THE REPORT: Tuesday, September 25, 2018

ACADEMIC YEAR 2017-2018

INSTRUCTIONS:

To comply with institutional effectiveness expectations, units/programs MUST:

- identify expected outcomes,
- assesses the extent to which it achieves these outcomes, and
- provide evidence of improvement based on analysis of the results

Guidance for preparing Unit Goals and Indicators of Success Reports:

- These reports should demonstrate on-going planning and assessment in each area. The results assist in decision making about curricular and programmatic revisions.
- Describe your Unit/Program Goal. Think about adding new goals or modifying previously reported ones.
- Choose a “Pillar for Success” from Lander’s Strategic Plan that your goal best aligns with.
- Timeframe: Each report should use data from the past year. For the Fall 2018 report you should use data from the Academic Year 2017-2018 or Calendar Year 2017. Historical data should be referenced in the Review and Summary of Expected Outcomes section if applicable.
- Use multiple assessments (Indicators of Success) for each Unit Goal if possible. *If this is a new goal, you may not have collected data yet. This is acceptable and should be indicated.
- Assessment Instruments: Develop and/or use methods and instruments that are uniquely suited to the Indicators of Success.
- Review and Summary of Expected Outcomes:
 - If you are using a goal that you have submitted in the past, please provide a narrative that includes an analysis of historical data and current data. It should include evidence of improvement or clarification of why improvement has not been accomplished. It should include a summary of what steps can be taken to accomplish the goal and what resources are needed to meet the goal or sustain the results.
 - If you are using a new goal and you have collected data, please provide a narrative that includes an analysis of your data and a plan for improvement. This plan should include a summary of what steps can be taken to accomplish the goal and what resources are needed to meet the goal or sustain the results. *If you are using a new goal and have not yet collected data, please provide a summary of why the goal has been added, how meeting this goal would improve your program/unit, and any expectations that you have for it.

1.6. REVIEW AND SUMMARY OF EXPECTED OUTCOMES – Date Reviewed: 5/10/2018

(THE FOCUS OF NARRATIVE SHOULD BE ON PROVIDING EVIDENCE OF IMPROVEMENT, BASED ON THE ANALYSIS OF THE ASSESSMENT RESULTS, AND NOT A PLAN FOR IMPROVEMENT):

1.6.1. **OUTCOME 1 COMMENTS:** The expected outcome for this indicator was met with an average rubric score of 2.33. The four previous year's scores were: 1.93 (2014), 2.09 (2015), 2.31 (2016), and 2.38 (2017). We will continue to monitor the effectiveness going forward.

1.6.1.1. **ADDITIONAL RESOURCES REQUIRED TO ACHIEVE OR SUSTAIN RESULTS FOR INDICATOR OF SUCCESS 1: 0**

1.6.1.2. **EXPLANATION OF HOW RESOURCES WILL BE USED:** N/A

1.6.2. **OUTCOME 2 COMMENTS:** The expected outcome was met with an average rubric score of 2.62. The four previous year's scores were: 2.38 (2014), 2.08 (2015), 2.80 (2016), and 2.29 (2017). We will continue to monitor the effectiveness going forward.

1.6.2.1. **ADDITIONAL RESOURCES REQUIRED TO ACHIEVE OR SUSTAIN RESULTS FOR INDICATOR OF SUCCESS 2: 0**

1.6.2.2. **EXPLANATION OF HOW RESOURCES WILL BE USED:** N/A

1.6.3. **OUTCOME 3 COMMENTS:** The expected outcome was met with our students having a mean of 147 which puts us in the 50th percentile nationally. Outcome 3 is a revised outcome from previous evaluation cycles. Historically, we considered student performance on the sub-scores for the different disciplines (organic, inorganic, analytical, and physical), but not the overall total combined score. In 2015, ETS stopped providing percentile rankings for sub-sections in a useful format. This is the first time we have used the MFT combined total score. In the next academic year, the department will investigate whether we wish to continue to use the MFT or switch to alternate nationally normed exams created by the American Chemical Society.

1.6.5. **OUTCOME 5 COMMENTS:** --

1.6.5.1. **ADDITIONAL RESOURCES REQUIRED TO ACHIEVE OR SUSTAIN RESULTS FOR INDICATOR OF SUCCESS 5:** --

1.6.5.2. **EXPLANATION OF HOW RESOURCES WILL BE USED:** --

1.7. **SUMMARY COMMENTS FOR OUTCOMES 1-5:**

Our students have demonstrated an understanding of modern scientific concepts related to organic, inorganic, analytical, and physical chemistry based on faculty evaluation of their performance on faculty evaluated senior seminar presentations, research and internship presentations, and a nationally normed chemistry exam.

1.8. **CHANGES MADE/PROPOSED TO PROGRAM AS A RESULT OF OUTCOMES 1-5:** We have compressed the use of the MFT exam. Previously, we had 4 separate outcomes (organic, inorganic, analytical, and physical) based on subsection scores, but did not use the combined, overall score. Because ETS stopped providing useful subscore percentile data in 2015 we have responded by using the combined MFT Chemistry score for which percentile data are available. In the next academic year, department will investigate switching from MFT exam to nationally normed exams produced by the American Chemical Society.

2.7. SUMMARY COMMENTS FOR OUTCOMES 1-5:

Our students have demonstrated appropriate scientific communication skills by presenting seminar presentations that are well organized, visually appealing, and verbally effective. Additionally, they have further demonstrated appropriate scientific communication skills by presenting research posters that are well organized and visually appealing.

2.8. CHANGES MADE/PROPOSED TO PROGRAM AS A RESULT OF OUTCOMES 1-5: Currently, research is not required for all students. In the next academic year, the department will revisit whether or not research will be required, or will remain optional. Also, in 2016-2017, we started a series of scientific communications seminar courses in an attempt to teach communication earlier in the program and give students more opportunities to give presentations. The first class of students affected by these changes are currently in their second year and have not yet reached the senior seminar course. Additionally, 2 indicators used in previous years were dropped from this year's report because the template for this report only allows 5 indicators, not 7.

3. UNIT/PROGRAM GOAL 3: Demonstrate skills necessary for safe and appropriate collection, analysis, and interpretation of data in chemistry laboratory experiments.

3.7. SUMMARY COMMENTS FOR OUTCOMES 1-5:

Our students have demonstrated the necessary skills for safe and appropriate collection, analysis, and interpretation of data in chemistry by presenting seminar presentations in which they have effectively analyzed and interpreted data, as well as through research presentations in which they have safely collected, analyzed, and interpreted experimental data.

3.8. CHANGES MADE/PROPOSED TO PROGRAM AS A RESULT OF OUTCOMES 1-5: A previously used indicator regarding critical thinking has been dropped for this report. That indicator was measured using a critical thinking sub-score from the MFT Chemistry exam. As indicated above, ETS no longer provides useful data on subscores. Additionally, the department is considering condensing and/or eliminating some of these indicators and goals next year. The first three goals all evaluate various aspects of student performance, but only align with a single University Pillar (#4). Considerations are being given into condensing these student performance goals/indicators and adopting goals that address other University Pillars.

4. UNIT/PROGRAM GOAL 4: To comply with Program Productivity standards as defined by the South Carolina Commission on Higher Education

(THE FOCUS OF NARRATIVE SHOULD BE ON PROVIDING EVIDENCE OF IMPROVEMENT, BASED ON THE ANALYSIS OF THE ASSESSMENT RESULTS, AND NOT A PLAN FOR IMPROVEMENT):

4.6.1. **OUTCOME 1 COMMENTS:** We have met both of our standards for this goal. To increase enrollment in our programs or degree completion we are going to need additional faculty, preferably 3 additional full-time positions. In the fall of 2018, the faculty in our department are overloaded because of the enormous need for students to take courses in physical sciences. In the incoming freshman class, the two largest majors are nursing and biology, both of which need a year of chemistry as a service course. Because we don't have the man-power, we are negatively impacting Lander students in two ways. First, we are cramming more students into individual lab courses, with lab sections routinely getting an extra student or two beyond what ought to be the cap. Having the extra students dilutes the ability of the instructor to provide the individual attention necessary for effective instruction. More importantly, having extra students in lab becomes a major safety concern. Second, because of the heavy service load, we are not able to offer as many upper level classes for our own students as we would like. Thus, we cannot be as responsive to market-driven demands because we lack the manpower to teach those courses that students want to take to prepare them for cutting edge careers. For example, forensics is a pillar program. If we are successful in bringing these students to campus, we **MUST** have more help to be able to teach them.

4.6.1.1. **ADDITIONAL RESOURCES REQUIRED TO ACHIEVE OR SUSTAIN RESULTS FOR INDICATOR OF SUCCESS 1:** \$150,000 for 3 positions

4.6.1.2. **EXPLANATION OF HOW RESOURCES WILL BE USED:** Salary for additional positions
